

The State / Federal RPS Collaborative

Invites you to attend the

National RPS Summit

Chicago, Illinois

Thursday, November 6 and Friday, November 7, 2008

Renewable Portfolio Standards (RPS) have emerged as perhaps the most important driver for clean energy investment in the U.S.

The **National RPS Summit** is designed as a working session where State energy policy makers and administrators, along with Federal government representatives and national organizations, convene for two days of information sharing and dialogue, focusing on how renewable portfolio standards are working and how to ensure their future success.

Summit Sessions:

- **Overview of status of RPS efforts nationwide**
- **Principles and best practices for State RPS programs**
- **Strategies for creating stronger regional REC markets**
- **The Federal role in RPS implementation**

Speakers include state public utility commissioners and RPS administrators, federal legislative staff, national renewable energy associations, and RPS experts.

Please Join Us!

We welcome participation by states that are considering adopting RPS programs as well as states that have programs in place. We invite program managers and policy makers, regional and national organizations, federal representatives, and other RPS stakeholders that are committed to ensuring the success of RPS programs and the expansion of clean energy markets.

Registration

There is no registration fee to attend the Summit, but registration is required and space is limited. A block of hotel rooms is available to participants; please contact Meghan@cleanegroup.org for more information about registration and the room block.

The National RPS Summit is hosted by Clean Energy Group
with funding support from The Energy Foundation and the U.S. Department of Energy
