**Clean Technology Implementation Network:  
Framework for Collaboration**

**Lew Milford  
Peter Mallaburn  
Allison Schumacher**

## Next Steps for Clean Technology Implementation Network:

---

- ❑ Do we have consensus about future cooperation?
- ❑ Can this consensus be advanced through a Clean Technology Information Network?
- ❑ How do we avoid duplication with other entities?
- ❑ How do we begin to explore organizational issues to start such a Network?
- ❑ What is the best near-term portal to share “best practices” and disseminate information?
- ❑ Who else should be involved in this discussion?
- ❑ If we were to have a six-month plan, what would that look like?

## Optional Networking Tools

<b>Website</b>	<b>Communication Strategy</b>	<b>Email List Serve</b>
<b>Online Forum</b>	<b>Database</b>	<b>“Best Practices” case studies</b>
<b>Journal for Funders</b>	<b>Interim Report: “Market-based Investment Approach” and Investment Delivery</b>	<b>Exchange/ training missions</b>
<b>Conference 2003/2004</b>	<b>COP-9 Milan 12.03? US venue?</b>	<b>World Conference on Renewable Energy Bonn 6.04?</b>

Clean Energy Group · 50 State Street · Montpelier, VT 05602
